

TIGERSECU H.264 2MP Series 16CH DVR Upgrading Instruction

Please download the DVR firmware from this link:

http://www.tigersecu.com/firmwareh264/2mp_16ch_20190916.zip

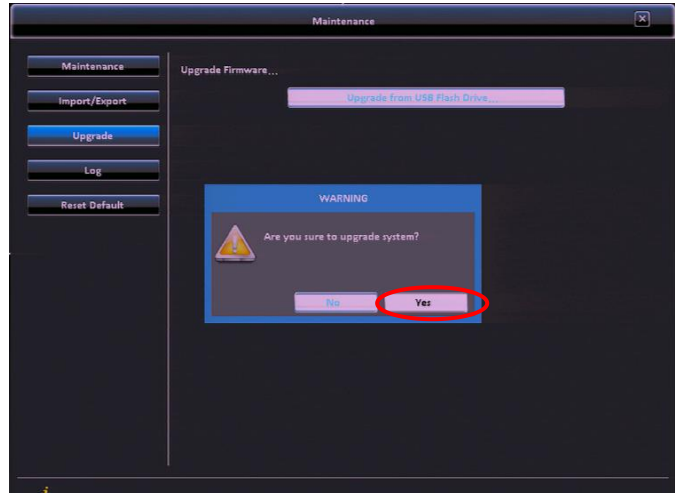

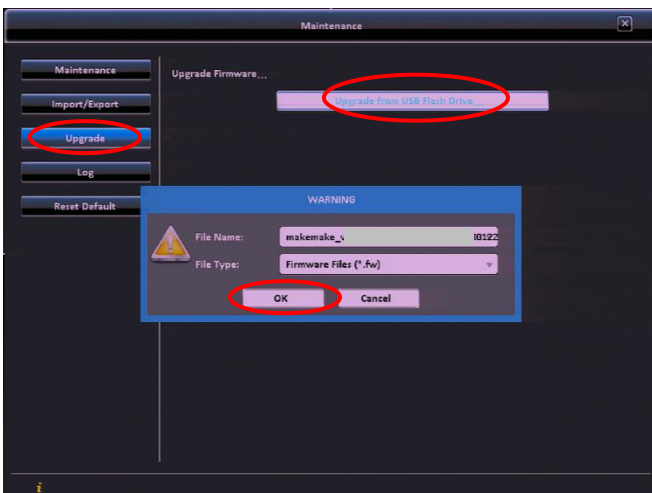

Step 1. Prepare an USB flash drive, format it firstly. (Recommend USB 2.0 Standard)

Step 2. Download the firmware zip file from the above link, unzip it.

Copy the “[makemake_vii_hb-Tigersecu-2.0b1c_20190916.fw](#)” file only and paste it into USB flash drive. (**Do not save it in a folder**)

Step 3. Insert the USB drive to the USB slot at the back of the DVR.

Step 4. Go to the DVR --> Main Menu --> Maintenance Menu --> Upgrade, Click Upgrade from USB flash drive, then read the file in the USB drive--> Click OK and Yes.

Step 5. Please allow the upgrade to complete.

Step 6. After it 100% completed, the DVR will beep and auto reboot. Wait 30-40 seconds for it restarting. Upgrading done!
